

# PETRONAS LUBRICANTS

## PETRONAS Sprinta 2T 2000 High Performance Two-Stroke Motorcycle Oil

### Intro

PETRONAS Sprinta 2T 2000 is a synthetic fortified motorcycle oil specially formulated for the superior protection of modern high performance two-stroke motorcycle engines.

Fortified with synthetic polyisobutenes base fluid, its unique high-performance low-ash additives system combined with highly refined base oils, will ensure exceptional performance and engine protection for the lubrication of high performance two-stroke engines.

### Applications

- Two-stroke motorcycle engines with automatic oil-injection or premix systems.
- Recommended for extreme performance air and water cooled two-stroke engines.

### Customer Benefits

- Reduced smoke
- Maintain engine efficiency and power for smoother performance.
- Provide superior lubricity and engine cleanliness.
- Excellent control against exhaust system blocking.
- Prevent seizure
- Prevent spark plug fouling
- Extended engine life
- Self-mixing with leaded and unleaded petrol

### Product Typicals

Characteristics	Value
Density @15 °C, kg/l	0.882
Pour Point, °C	-9
Flash Point, °C	124
Kinematic Viscosity, cSt	
@ 40 °C	79.8
@ 100 °C	10.1
Viscosity Index	108
ASTM Colour	Green

### Specifications

Exceeds the requirements of :

- JASO FB
- API TC
- All Major Motorcycle Manufacturers
