

PETRONAS LUBRICANTS

PETRONAS Sprinta 2T 5000 Ultimate Performance Fully Synthetic Four-stroke Motorcycle Oil

Intro

PETRONAS Sprinta 4T 5000 is a fully synthetic SAE 10W-40 multigrade engine oil specially engineered based on the racing oil technology intended for use in modern high-revving, high-performance four-stroke motorcycle engines.

Formulated with synthetic polyalphaolefin base fluid and specially selected extreme performance additives to guarantee the ultimate engine protection under all operating conditions. It has been tried, tested and proven under most extreme track and road conditions.

Applications

- High performance air and water cooled four stroke motorcycle engines, including race tuned and turbocharged engines.
- Two-stroke motorcycle gearboxes

Customer Benefits

- Ultimate engine performance
- Excellent engine and transmission protection from excessive wear
- Outstanding engine cleanliness - ensures low engine wear, prolongs component life and maintains high power output
- Exceptional engine protection - extends engine life
- Ultra smooth gearshift and clutch performance - ensure free flowing, "jerk-free" movements
- Fully compatible with leaded or unleaded petrol

Product Typicals

Characteristics	Value
Density @15 °C, kg/l	0.851
Pour Point, °C	-33
Flash Point, °C	238
Kinematic Viscosity, cSt	
@ 40 °C	128.9
@ 100 °C	15.7
Viscosity Index	128
ASTM Colour	3.0

Specifications

Exceeds the requirements of:

- JASO FB
- API SJ
- All Japanese & European Motorcycle Manufacturers
