

PETRONAS LUBRICANTS

PETRONAS Sprinta 4T 4000 Super High Performance Semi-Synthetic Four-Stroke Motorcycle Oil

Intro

PETRONAS Sprinta 4T 4000 is a semi-synthetic SAE 10W-40 multigrade engine oil specially engineered based on the racing oil technology intended for use in modern high-revving, high performance four-stroke motorcycle engines.

It is blended with synthetic polyalphaolefin base fluid, highly refined mineral base oils and specially selected superior performance additives to provide exceptional engine protection under all operating conditions.

Applications

- High performance air and water cooled four stroke motorcycle engines, including race tuned and turbocharged engines.
- Two-stroke motorcycle gearboxes

Customer Benefits

- Superior engine performance
- Excellent engine and transmission protection from excessive wear
- Excellent engine cleanliness - ensures low engine wear, prolong component life and maintain high power output.
- Exceptional engine protection - extends engine life
- Very smooth gearshift and clutch performance - ensure free flowing, "jerk-free" movements
- Fully compatible with leaded or unleaded petrol

Product Typicals

Characteristics	Value
Density @15 °C, kg/l	0.875
Pour Point, °C	-33
Flash Point, °C	228
Kinematic Viscosity, cSt	
@ 40 °C	100.3
@ 100 °C	14.1
Viscosity Index	143
ASTM Colour	2.0

Specifications

Exceeds the requirements of:

- JASO MA
- API SG
- All Japanese & European Motorcycle Manufacturers
